

All 4 stages are differentiated by the creation of folders.
These folders have the same name as the state in which they were created.

Restore State 2:

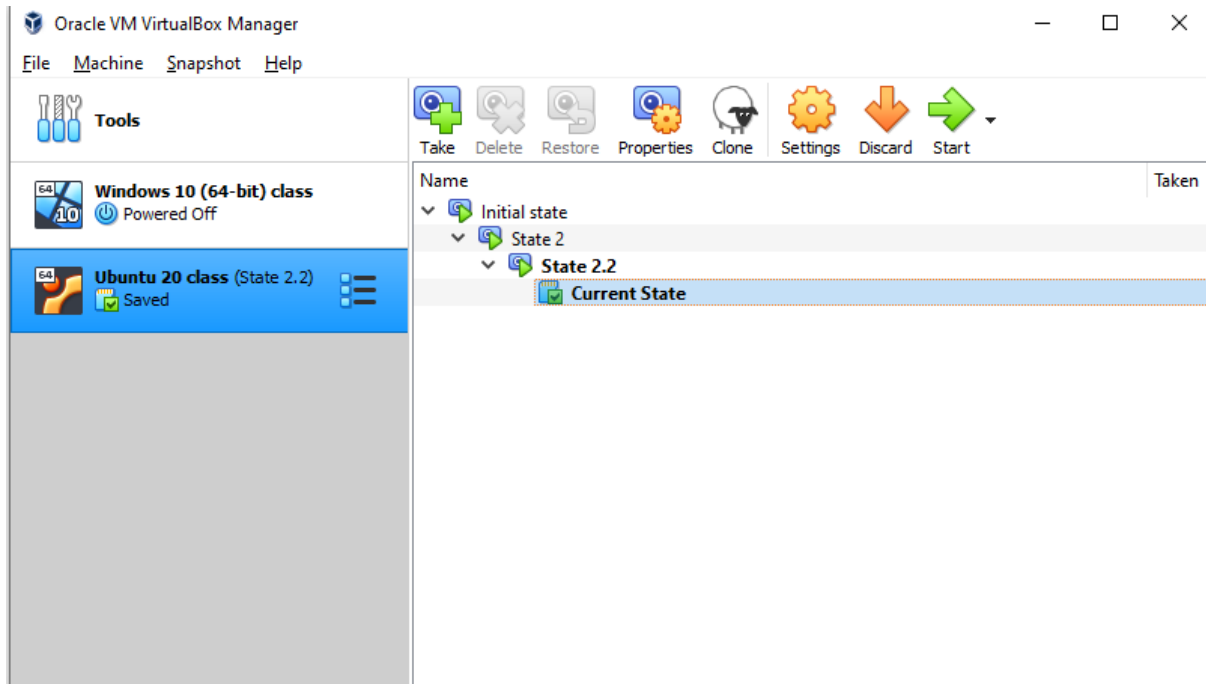

Delete State 2.1 and explain what happens:

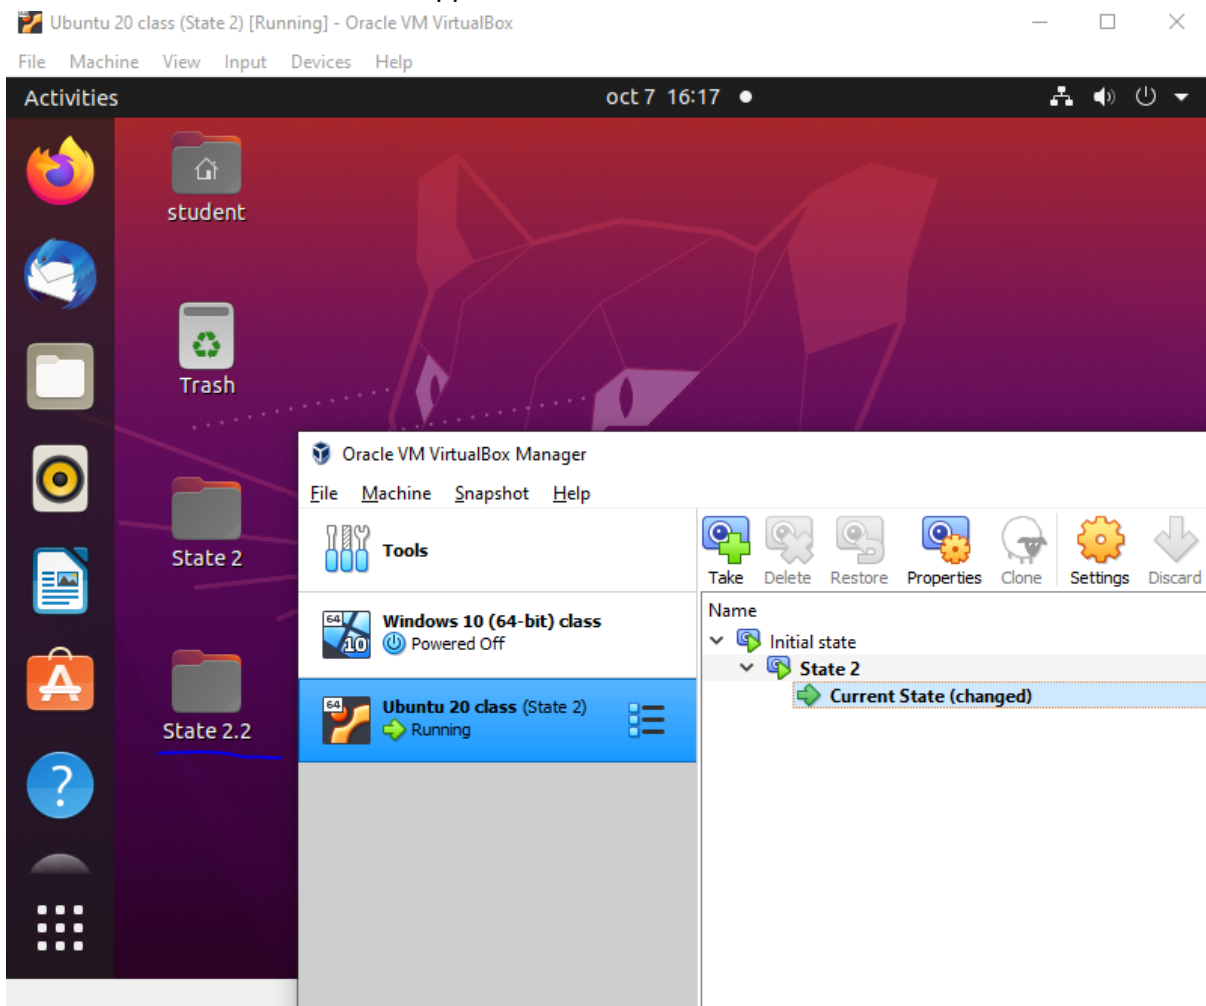

The State 2.1 gets deleted and VirtualBox does not merge the states as it was alone.

Restore State 2.2:

Delete State 2.2 and see what happens:

The State 2.2 merges with the State 2.
